Title:
ILSAC GF-4 ENGINE OIL STANDARD
Models:
'06 Toyota & Scion

ENGINE
EG001-06
REVISED

TSB REVISION NOTICE:

- January 13, 2006: A note has been added regarding a separate TSB for Prius vehicles. The references "excluding hybrid vehicles" have been removed from this TSB.

Previous versions of this TSB should be discarded.

Introduction For the 2006 model year, all Toyota and Scion vehicles come from the assembly plant filled with ILSAC GF-4 engine oil. The new oil is compatible with all previous oil standards and should be used at all maintenance intervals.

NOTE:

- Be sure to use the correct viscosity grade of motor oil when servicing vehicles. The recommended oil viscosity varies according to the engine. If 5W-30 is the primary specified oil but is NOT available, 10W-30 may be used. However, it should be replaced with 5W-30 at the next oil change. Please refer to the Owner's Manual for additional information.
- For Prius vehicles, refer to TSB No. EG050-04, "Engine Oil Specifications."

Applicable Vehicles

- **2006** model year **Toyota** and **Scion** vehicles.
